

Bug ID	BUG-004
Date	06-Sep-22
Created by	Mihajlo Stojanovski
Assigned to	John Smith (developer)
Test case ID	LINKS - TC1, LINKS-TC2
Found in Version	1.0.0.1
Priority (Critical, High, Medium, Low)	Medium
Title	Registration form: Phone format check not implemented
Environment	OS Windows/MacOS/Linux/Android/iOS
Preconditions	None
Description	<p>When a user would enter a phone number they can enter any alphanumeric characters without following the phone formatting +389XXXXXXXX</p>
Sprint	Current sprint
Attachment	/
Steps to reproduce	
1	Go to the website https://www.links.hr/hr/register
2	Fill in all of the fields prior to phone number
3	In the phone number field enter alphanumeric characters

4	Fill all the fields and click on Register
Actual results:	The registration is successful and it should not be.
Expected results:	There needs to be a check for the phone number formatting when the number is entered for both individual and company phone number. An error message needs to appear informing the user that they have entered a number with an incorrect formatting.
